[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Highly motivated with a mindset to continuously learn and expand my knowledge base. Ensure I always take a step back from a situation to see what I can learn to help grow as a better person and colleague.

Technical Skills

Frontend: HTML5, CSS, JQuery, Javascript, PHP, Bootstrap, AJAX, Bulma FontAwesome.

Backend: MySQL, MSSQL, MongoDB, Express, ReactJS, Node, Handlebars.

Projects

Remindr | [Repo](#) | [Deployed](#)

Project Manager | Express / Node Expert

- Email / SMS (In Development) notification app
- This application allows you to set notification reminders from the Dashboard. I was the lead of the Project, delegating responsibilities to other members and holding Stand-Ups to resolve blockers. I created the API management between front-end and back-end Database communication.
- JavaScript, JQuery, Sequelize, NodeJS, Heroku, JawsDB MySQL, Session Management

Cairn | [Repo](#) | [Deployed](#)

Project Manager | API Integrations Expert

- Works with the National Parks API and Weather API for park and weather information.
- This application lets the user choose a State, then be displayed with information about all National Parks in the State, and a weather forecast. I was responsible for delegation and curating the Data for the API integrations
- JavaScript, JQuery, Local Storage, Insomnia (API Manager),
